MOOG COMPONENTS GROUP ADDS NEW FACILITY

Blacksburg, VA -- Moog Components Group announced today that the Company is constructing a new 72,550 sq. ft. building located adjacent to the current location at 1213 North Main Street, Blacksburg, VA.

The new facility will house a variety of manufacturing processes including machining, assembly and testing. Moog designs and manufactures high performance motion and fiber optic components for medical, industrial, aerospace and defense applications. There are two other Moog locations in Blacksburg.

Moog Components Group is one of the largest manufacturers in the New River Valley with over 1,100 employees who work in a variety of production, technical, engineering and business functions. Moog began its history in Blacksburg over 50 years ago, and today offers a product portfolio including slip rings, motors, resolvers and fiber optic components. Moog Components Group also has operations in Galax, VA, Murphy, NC, Naples, FL, Springfield, PA, Halifax, Canada and Reading, England, which manufacture additional product lines. Moog Components Group is a business unit of Moog, Inc., headquartered in East Aurora, NY.

Moog Inc. is a worldwide designer, manufacturer and integrator of precision control components and systems. Moog's high performance systems control military and commercial aircraft, satellites and space vehicles, launch vehicles, missiles, automated industrial machinery, marine and medical equipment.
