

FOR IMMEDIATE RELEASE

SAIC OPENS OFFICE AT VIRGINIA TECH

(SAN DIEGO and MCLEAN, Va.) November 27, 2007 - Science Applications International Corporation [NYSE: SAI] announced today that its Technology and Advanced Systems Business Unit has opened an office in the Virginia Tech Corporate Research Center in Blacksburg, Va.

The new SAIC office opened Sept. 10 and will help grow a team of cleared IT professionals to support projects of national significance beyond the Capital Beltway.

SAIC leaders say these aspiring IT professionals will enjoy the benefits and lifestyle of living and working in a smaller community, while gaining the career experience typically offered in major metropolitan areas such as Northern Virginia. The company expects to hire several students to work at the 3,500 square foot office within the next calendar year. Those selected will gain practical experience in areas such as software development, database administration, system administration, and application help desk services.

“Virginia Tech is considered a magnet for bright, technically talented individuals,” said Gary Hartless, manager of the division sponsoring the new office. “It’s exciting to open an office in a strategic location that can benefit those looking to launch their IT careers by helping solve some of the nation’s most important problems.”

SAIC is a leading provider of scientific, engineering, systems integration and technical services and solutions to all branches of the U.S. military, agencies of the Department of Defense, the intelligence community, the U.S. Department of Homeland Security and other U.S. Government civil agencies, as well as to customers in selected commercial markets. With approximately 44,000 employees in more than 150 cities worldwide, SAIC engineers and scientists solve complex technical challenges requiring innovative solutions for customers’ mission-critical functions. SAIC had annual revenues of \$8.3 billion for its fiscal year ended January 31, 2007. SAIC: FROM SCIENCE TO SOLUTIONS®
